

Some ideas on biomolecular data

- Encode both geometric and (richer) topological information
- Multimodal data, e.g., LLM
- Towards foundation models for drug discovery, e.g., prior-fitted networks

Ideas on molecular data

Wei, R.K.J., Wee, J., Laurent, V.E. *et al.* Hodge theory-based biomolecular data analysis. *Sci Rep* (2022)

molecular graph and simplicial complex representations for a protein (ID:2OFS)
